F2 LEAN MATRIX

Updated 06-20-17

Abstract

Learn how to access and understand the elements that make up the F2 Lean Matrix. This view of the F2 Variance data was updated in November 2016.

Operations Variance

Operations Research, Insight and Continuous Improvement

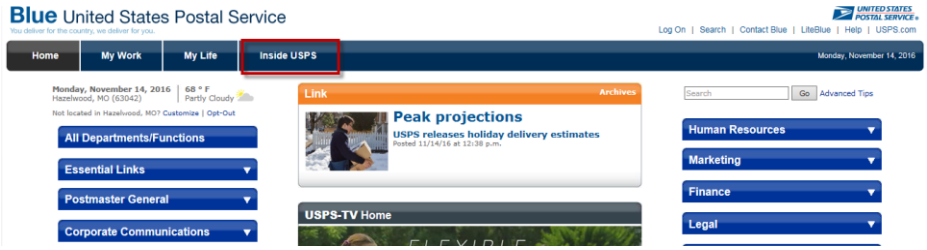
Function 2B Lean Matrix Overview

The Function 2B Lean Matrix ranks Areas, Districts, MPOO's, and Units based on 10 performance elements. These performance elements are expressed as a percent comparison to plan, SPLY or to base in most cases. Others are strictly the performance indicator (F2 OT% or $Cost/Delivery). Each of the 10 performance elements are weighted. A Total Score is then calculated to demonstrate overall performance on those elements.

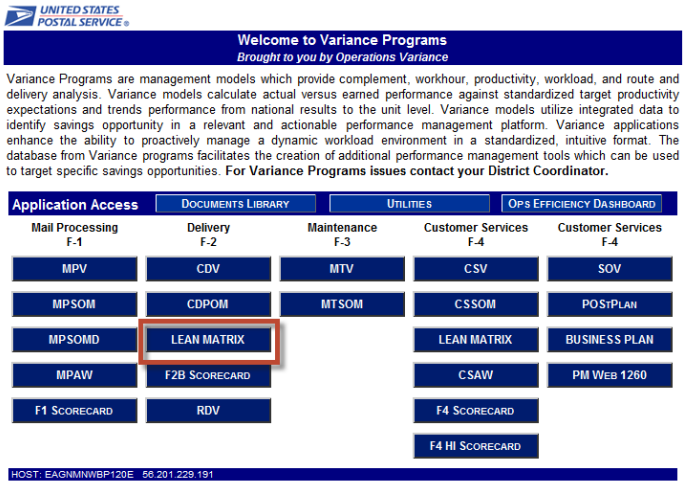
The performance elements in the matrix are budget performance, city carrier overtime, city deliveries per hour, street efficiency indicator, office efficiency indicator, street hours to base, cost per delivery, LDC 23 & 27 hours to SPLY, and Carriers back by 1700. Parcel growth rate and cased volume are also included for informational purposes.

Accessing the F2 Lean Matrix

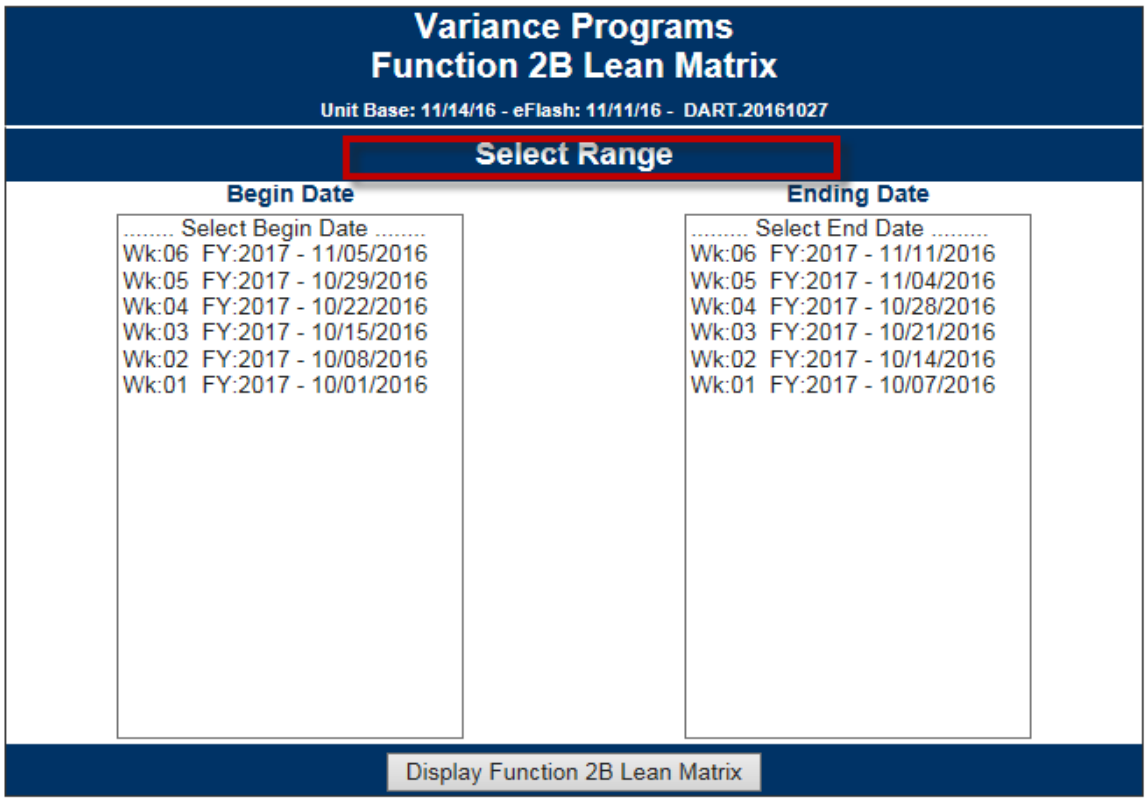
1. Go to Variance programs page by typing in *variance.usps.gov* into internet explorer address bar or from the USPS Home Page, Select Inside USPS and then select Variance under the Operations heading.



2. Entry into F2 Lean Matrix: Click *Lean Matrix Button*



3. Select Range of dates.



F2 Lean Matrix Introduction

The initial view of the Lean Matrix will display the selected date range for each Area. From this view, the user can select the Area to drill down to the districts within that Area. If the user selects a district, the display will change to MPOO and from MPOO, user can drill to unit.

Explanation of F2 Lean Matrix Elements

FUNCTION 2B LEAN MATRIX

NATIONAL AREAS

6 DELIVERY DAYS 06/10/2017 THROUGH 06/16/2017 (201737 - 201737)

VARIANCE HOME | RANGE SELECTION | NATIONAL AREAS | NATIONAL DISTRICTS | MAJOR METROS | PCES OFFICES | LEVEL 26 | LEVEL 24

	Target	<=0	<=0	<=8.0%	>=0	>=0	>=0	<=0	<=0.60	<=3.0%	=100.0%			
	Weight	12.0%	10.0%	10.0%	12.0%	12.0%	13.0%	8.0%	5.0%	10.0%	8.0%			
	Charts													
Rank ↓	Area	F2C % Plan	F2C % SPLY	F2C OT%	City DPH % to SPLY	SEI % To SPLY	OEI % To SPLY	Street Hrs % To Base	Cost Per Del	23 & 27 To SPLY	Carriers % By 1800	Parcels per Rte +/- SPLY (pcs/day)	Cased % to SPLY	Total Score

There are 10 weighted elements with a target. The target and weight for each element are listed above the element. The weighted elements are used to calculate the last column, Total Score. When the National Areas view is selected, a Charts Icon is displayed. The chart icon links to a chart of the selected element.

- Function 2C % to Plan and SPLY are city carrier budget performance to plan and SPLY. Includes LDC 21, 22, 23, 24, 27, 28, and 29.
- Function 2C OT %. OT rate for range selected. Includes LDC 21, 22, 23, 27, 28, and 29.
- City DPH (TEI in eFlash) % to SPLY. Deliveries per hour compared to SPLY
  - Cumulative Possible Deliveries ÷ sum (LDC 21+LDC 22+LDC23+LDC24+LDC26+LDC27 +LDC28+LDC29+LDC92) hours
- SEI % to SPLY. Street Efficiency Indicator comparison to SPLY.
  - Deliveries ÷ LDC 22 hours
- OEI %to SPLY. Office Efficiency Indicator comparison to SPLY.
  - Deliveries ÷(LDC 21 + LDC 29 Hours)
- Street Hours % to Base. Comparison of the actual hours per route compared to the DOIS Base hours per route.
  - LDC 22 hours
- Cost Per Delivery
  - Dollar cost of F2B Salaries & Benefits/Cumulative City Possible Deliveries
- 23 & 27 to SPLY. Comparison of the actual hours from LDC 23 and 27 to SPLY.
  - LDC 23 – Other City Delivery
  - LDC 27 - Collections
- Carriers % by 1800. Percentage of carriers returned by 1800
  - # returned by 1700 ÷ # of total carriers on LDC 22

Two elements included for informational purposes, but are not weighted and not included in the Total Score calculation.

- Parcel per Route +/- SPLY (pcs/day)
- Cased % to SPLY. Comparison of cased volume to SPLY.
  - Total cased volume, including letters and flats.

Data Sources: eFLASH and DOIS

Rank and Total Score Calculations:

Rank and Total Score are both relative numbers based on the current user view. In other words, when viewing the districts in the Eastern Area at the Area level, the Rank and Total Score compared to the 9 Eastern Area districts will be different than their Rank and Total Score when viewing the National Districts page and comparing all 67 districts.

The overall Rank displayed on the matrix is based on the Total Score. ***The lower the Total Score the better the Rank.***

The Total Score is a weighted calculation; each category shown in the matrix with a value is included in the calculation. However, an entity (e.g. Area, District, MPOO, or Unit) is only scored on the elements in which they participate.

In the example below, Breese is scored on a participating weight of 0.82 (1.0-0.10-0.08), Marissa is scored on a participating weight of 0.92 (1.00 - 0.08), and Festus is scored on a participating weight of 1.0. This prevents an entity from being rewarded or penalized due to activities in which they do not participate.

	Target	<=0	<=0	<=8.0%	>=0	>=0	>=0	<=0	<=0.60	<=3.0%	>=97.0%			
	Weight	12.0%	10.0%	10.0%	12.0%	12.0%	13.0%	8.0%	5.0%	10.0%	8.0%			
Rank ↓	Unit	F2C % Plan	F2C % SPLY	F2C OT%	City DPH to SPLY	SEI To SPLY	OEI To SPLY	Street Hrs To Base	Cost Per Del	23 & 27 To SPLY	Carriers By 1700	Parcel Growth By Route To SPLY	Cased % to SPLY	Total Score
1	BREESE PO	-8.20	-22.76	1.79	7.89	3.93	23.19	-3.26	0.50			14.20	-33.81	0.19
2	MARISSA PO	-11.76	-18.92	6.67	2.66	8.03	-23.17	-31.88	0.51	-100.00		-5.90	22.01	0.30
3	SPARTA PO	-6.93	-24.19	10.64	9.69	28.42	-88.91	-7.06	0.57			-2.60	18.24	0.32
4	CARLYLE PO	0.00	-22.30	5.56	10.73	6.64	9.27	7.32	0.58	0.00		-2.47	-11.62	0.33
5	FESTUS PO	-4.28	-21.15	10.28	7.93	5.07	15.79	-2.86	0.85	0.00	94.74	-2.82	3.16	0.33

		<=0.60	<=3.0%
		5.0%	10.0%
Rank ↓	to	Cost Per Del	23 & 27 To SPLY
1	TA0	0.38	0.00
2	LIP	0.97	-5.00
3	LC	0.58	
4	HA	0.73	32.35
5	WI5	0.51	-11.11
6	BR9	0.46	
7	WE3	0.52	
8	BO0	0.50	-100.00
9	AB1	0.44	0.00
10	OA	0.68	18.18
11	FR1	0.73	-11.76
12	CC	0.87	130.26
13	JO	0.80	16.67
14	ED	0.51	360.00
15	TH	0.81	0.00
16	LU	0.90	53.92
17	HA0	0.86	
18	AB	0.69	150.00
19	HA	0.72	162.50

For each element the maximum rank takes into account the participation of the entities. In the example to the left, the rankings for Cost Per Delivery would be from 1 (best score) to 19 (worst score). Category 23 & 27 to SPLY would only have ranks from 1 to 15 since four of the entities do not participate in that category. Individual category ranks are not displayed in the matrix, but are used in the Total Score calculation.

The Total Score calculation for each entity is:

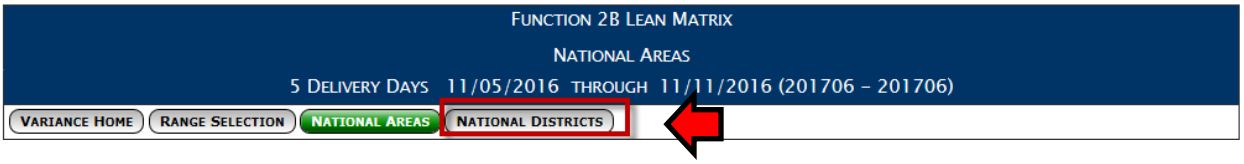
SUM ((Category1 Rank / Category1 max rank) * (Category1 Weight), (Category2 Rank / Category2 max rank) * (Category2 Weight),…)/ (Participating Weight)

So an entity that participated in just the two categories shown here might have a calculation like:

Total Score = [(3 / 19 * .05) + (9 / 15 * .10)] / (.15) = .45

Navigation

From the initial view, the user can also select the National District button at the top to display the performance by all 67 districts.



From any view, the user can sort any of the columns by clicking on the column name to re-sort the metric. The column heading will indicate the direction of the sort by the ↑ or ↓. The value of each element is color-coded based on whether the value is below (red) or above (green) target.

Understanding the F2 Lean Matrix

If the unit is selected, the F2B Lean Matrix worksheet opens in a new window and provides additional information about the unit that's not visible from the Lean Matrix view. Shown below are how some of the elements are linked to other views or reports.

Used to calculate street hours to base

F2B Lean Matrix

Notes:

1. In the F2 Lean Matrix, the City DPH% to SPLY may differ slightly from eFLASH. HQ Delivery Operations specified that the Lean Matrix version only include City Deliveries and City Delivery hours so this is the cause of differences when compared to eFLASH.
2. Lean Matrix Update – Weekly on Monday Mornings
3. eFLASH Updates – Updates can occur throughout the week due to LTATS transfers, corrections, etc.

Other F2 Resources

From within the F2 CDV model Unit Variance page, the user can click on the to get to the CDV Explanation Page which provides additional information on the calculations in the F2 Variance models.

FOT: Fixed Office Time

HQ Operations Variance team is part of the larger HQ department of Operations Research, Insight and Continuous Improvement. The team is responsible for the development and maintenance of the Variance Program website, databases, and models. The team also provides Tier 2 technical support and can be contacted using the distribution list *FOS_Support* after users contact their District and Area Coordinators.
